

The EASIEST Way to Make 200,000+ Satoshi Right Now

This simple step by step guide will show you how to make 200,000+ Satoshi right now. Anyone can do it and you can get started right now.

Summary: This guide shows you how to get [5 free Latium Coins](#) (an “Alt Coin – i.e. alternative to bitcoin) just for joining their site and making a Latium wallet. **And how to instantly sell them for 50,000 – 200,000 satoshi** (depending on market value, or depending on if you hold them as there is a lot of talk right now about Latium, and trading is quite active – we think it’s got a great future and we are holding).

Step 1 – [Signup to Latium](#) to receive your 5 free Latium Coin

Go and join, make an account, and ensure to use your real email as you will have to confirm it in a minute.

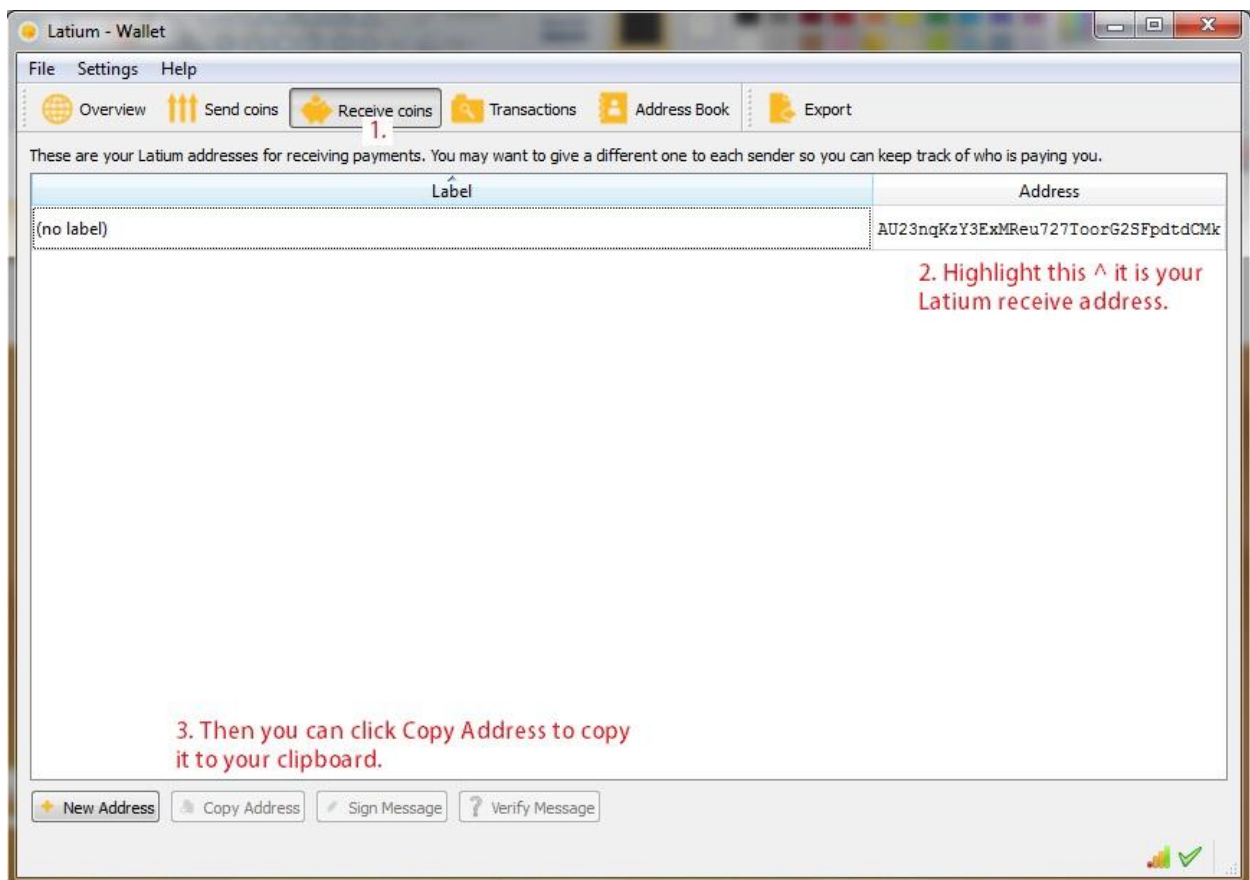

Step 2 – [Download the wallet](#) and let it sync

This will take a few minutes to fully sync and get up to date, but you can do other things in the meantime. Here’s what the wallet download screen looks like:

Step 3 – Find and copy your wallet receive address

Open up the Latium client you just downloaded – you can use it while it continues to sync. Click on the “Receive Coins” tab along the top to display your wallet address, and you can copy it by clicking on it and pressing “Copy Address” on the bottom.

Step 4 – Go back to the [Latium Website](#) and enter your receive address

Go back to the [Latium website](#) where you are creating your profile and enter your receive address there – this will ensure that when you have completed the signup process your 5 Latium go to your personal wallet.

Step 3 Of 3

1. Paste The Copied Address From Step 2 In The Form Below
2. Click The Submit Button

[Back To Step 2](#)[Submit](#)

Step 5 – Verify your account

Your account is now setup and you just need to go to your email and verify it.

Your Latium Account Is Now Approved!

Please check your registered email inbox for an approval email. This email contains information on how to set your password. You will be able to access your account immediately after creating a password.

Important! Your free Latium will not be available for withdrawal until your account has been reviewed by our Fraud Team. The Fraud Team reviews accounts Monday-Friday for the previous day's registrations. Once our fraud check is complete, your Latium will move from pending to approved and will be available for withdrawal.

Step 6 – Request Payment

For this step you need to ensure your latium downloaded wallet is fully synced with the network – you will see the progress on the home-screen. Once it is, within the latium website navigate to Reports > Payouts to me.

And then in this screen select "Request Payout" (I just have in this picture, the button is then replaced by green text saying "Your payment request was sent").

Financial Overview

You have **LAT 5.0000** in approved unpaid commissions and **LAT 5.0000** in commissions waiting for approval by merchant

Your payment request was sent. ^{3.}

History Of Payouts To Me

No data or nothing matches your search

Real list should look like this:

** This is usually sent the same day, but depending on when you request it might be the next day until it is processed and you receive it to your Latium wallet.. don't panic, just wait 😊*

Step 7 – Join Coin-Swap

Once you have your Latium in your wallet you can join Coin-Swap (it's a free exchange for selling and trading Alt coins); where you can sell it.

Coin-Swap.net - Bitcoin and Cryptocurrency Exchange

🔒 Fast and Secure

We have designed a state of the art trade engine that processes your order as soon as it is submitted. We log and verify every transaction that moves through our system to provide an extremely safe and secure trading environment.

🔄 Easy price changes

Want to change the price of your order? Don't cancel it only to create another one, just change the price! Why can't they all be this easy?

✓ Simple Interface

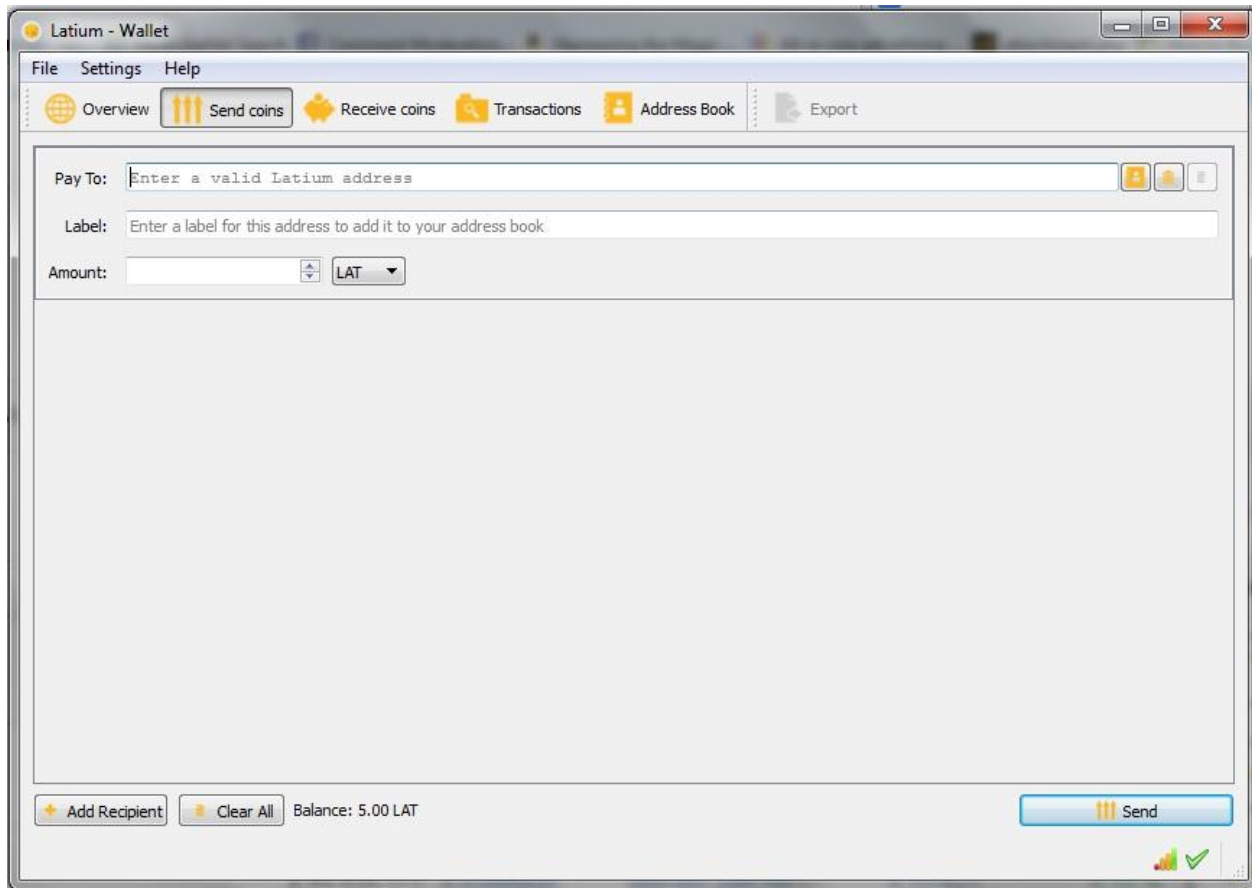

We have designed our interface to be as simple and straight forward as possible. You won't need a manual to use this site, but we have one available anyway! Here is our Quick Start guide to get you started as fast as possible.

⚙️ Designed to scale

Built on the Amazon EC2 cloud, we are designed to scale! We use Amazon's state of the art cloud technology to bring power to your trade experience!

Step 8 – Send your Latium to Coin-Swap

Inside Coin-Swap, navigate to “Balances” and go down to the (LAT) Latium listing. click on “Request Address” and send your Latium coins to this Coin-Swap address using your Latium desktop wallet software:

Your transaction will need to get 10 confirmations before it will show up in your coin-swap account (this can take 10 – 15 minutes).

Step 9 – Sell your Latium for bitcoin 😊

When you receive your Latium into your Coin-Swap account, navigate to “Markets” and click on LAT/BTC, then scroll down to “Sell LAT”, fill out & submit the sell order for your 5Lat.

Your coins will sell instantly and you will see in your “Balances” column you have btc now instead. You can then transfer this back to your normal [Coinbase](#) or [Bitalo](#) wallet, or whatever wallet service you usually use by going to “Balances” and click “Withdraw” by your bitcoin balance. Then enter your normal bitcoin address and click submit.

2. Submit Sell Order

\$\$\$ Extra Steps to Make Even MORE! \$\$\$

1. Refer your friends

Your first 5 Latium could be just the tip of the iceberg – **the real beauty in this coin lies in it’s referral program.**

Latium isn’t “mined” like bitcoin – it is created by new members.. so when you join, your 5 Latium is created..

BUT you can refer your friends and when you do you also **get 5 Latium extra for each referral!**

And it doesnt stop there – the Latium referral network goes 100 tiers deep, so you earn even more Latium on your friends referrals, and their referrals, and their referrals, referrals and so on **down to 100!** Here is the completely referral tier and payout:

And if you want to take it really seriously then you can share your link on bitcoin and altcoin blogs and forums, and you can even sign up to cheap advertising sources especially for bitcoin and altcoin interests – here are the best ones:

- [BTC Clicks](#) – The biggest and most active “paid to click” bitcoin site – the members here receive free bitcoin for viewing your ads, and they are all therefore interested in getting free bitcoin! Perfect!
- [A-Ads](#) – The largest ad network specifically for bitcoin and altcoins – you can pay directly in bitcoin too.
- [Coin Url](#) – Another great place to post your link and have it seen by 1000s of people.

** this is actually where I found out about Latium, there are a LOT of people promoting it and advertising it, so **there is money to be made here!***

2. DON'T SELL... Hold your Latium until it is more valuable

Now we don't know the future but we think the coin has a lot of potential – there are 1000s of people joining Latium every day there is a lot of advertising for it, and it is actively being traded. Today it was the most traded coin at Coin Swap:

The screenshot shows the Coin-Swap.net website interface. On the left, there's a 'BTC Markets' table with columns for Coin, Price, and Change. The table lists several coins: 66, AC, AID, ASCE, BC, BELA, and BLTR. The 'LAT / BTC' coin is highlighted with a red box, showing a price of 16.44 BTC in the last 24 hours. To the right of the table, there are three featured coin cards: 'Coin of the Day Blazecoin (BLZ)', 'Highest 24hr volume LAT / BTC', and 'Highest 24hr change KOOL / BTC'. Below these cards, the website's main heading 'Coin-Swap.net - Bitcoin and Cryptocurrency Exchange' is visible, followed by four key features: Fast and Secure, Easy price changes, Simple Interface, and Designed to scale.

Coin	Price	Change
66	0.09173423	+83%
AC	0.00000026	-70%
AID	0.00000000	0.00%
ASCE	0.00000639	+211%
BC	0.00013000	-13%
BELA	0.00000042	-25%
BLTR	0.00001500	0.00%

The price has varied between 10,000 satoshi per coin, and 40,000 satoshi recently, and simply put; 1. the more people who get involved in the coin 2. the more people who trade it, and 3. the bigger the ratio is of people who are holding the coin to those who are selling it – will push the value of the coin UP – and all three of these factors seem to be the case.

If you take this advice then we hold no responsibility, it is your risk to take, but I am quite positive and I am holding mine anyway
